- 33.5"
- 4" bleed
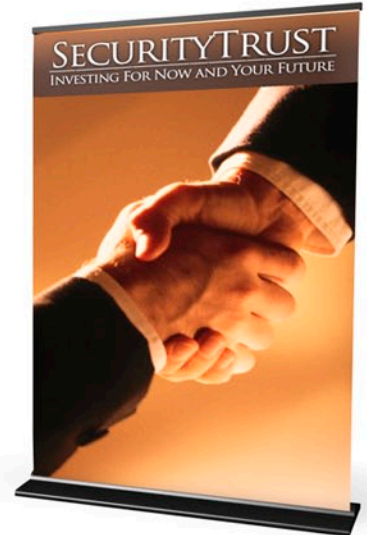

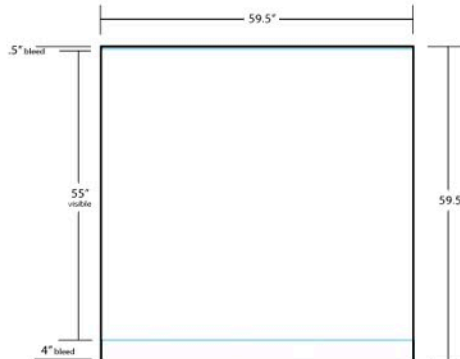

Print Ready File Creation

Prepare files as a single image in TIFF or PDF exports. Please do not send
original Photoshop, Illustrator or InDesign files as we do not manipulate files.
- All fonts and texts must be converted to curves.
- Resolution: Equivalent to 100% final size at 100-120 dpi. Check your files for pixilation
or banding on color gradations.
- Use LZW compression on TIFF files and compress everything using ZIP. Pay attention to live viewable areas.

Digital large format printers do not print PMS or RGB colors. Please prepare all art in CMYK color
space. If color matching is crucial for your project, our design team can manually adjust colors to
match a PMS reference as close as possible. A printed proof is recommended. Additional fees
apply.
